Application Release Notes

Product:	Meter Site Manager 2
Release Date:	1/10/20
Version:	2.6.0.7
Database:	2.4
PowerMaster Application	Model 3 Series – 2.1.2.1 or higher Model 7 Series & 5 Series – 1.1.0.8 or higher Model 4 Series – 1.0.1.12 or higher Windows CE (BSP): 2.2.1.0.100312 or higher

The following are changes included in Release 2.6.0.7

1. Changed connectivity to no longer require Windows Mobile Device Center and better support Windows 10 . Once connected, the PowerMaster will now appear as a USB mass storage device. All functionality of the application will remain unchanged.
2. Fixed bug in the Phantom Load Setup that prevents the current amplitude to display in the meter test report.
3. Added ability in User Preferences to allow the user to select the location for application data.
4. Added ability to export data into a custom Excel template. The user can select the template location in User Preferences. The template can be found on Powermetrix's Technical Library (<https://www.powermetrix.com/technical-library/>).
5. Added ability to export and synchronize data using an independent SQL Server stored on a local machine. All data is synchronized when the application closes.

Stand Alone Application

1. Added a stand-alone application to run a batch conversion for waveform files. This tool will allow the user to browse a folder of waveform files (.bin) and convert them into .csv formats. This application can be found on Powermetrix's Technical Library (<https://www.powermetrix.com/technical-library/>).
